DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 & 11-49 are allowed.

- 2. The following is an examiner's statement of reasons for allowance:
- This intention involves the application of well-known technology from a closely related 3. field. It is well known to those in the computer arts to link a word or symbol with information concerning that word or symbol. This is the essence of context-sensitive help. Since the beginning of prosecution, Applicant and Examiner have disagreed concerning the applicability of this technology to the gaming machine art. Applicant has maintained that the arts are separate enough that innovations in the computer art will not necessarily find their way to the gaming machine arts. Examiner has disagreed - maintaining that a modern gaming machine is nothing more than a computer.

Applicant has submitted evidence of long-felt need in an effort to rebut Examiner's assertion. This evidence is in the form of a Declaration Under 27 CFR §1.132 of Susan Abernathy. In this declaration, the declarant summarizes reports received by the assignee of the instant application from the casinos in the gaming industry. It appears from the declaration that at least since 2000, casinos have been reporting that their patrons have had problems understanding gaming machine paytables. Since this is some years after the adoption of hyperlinked help in the computer industry in general, Examiner believes that this evidence of long-felt need outweighs his assertion that it would have been obvious to apply this technology to the gaming machine art.
